

Renault Traffic 2001–2014 Van Workshop Service Repair Manual

The van exists in numerous variations, from a 3-seater with all the back area readily available for tons, to a 9-seater. Its name is based upon the French word for "profession" or "website traffic" (depending upon the context).

A light renovation in 2006 saw the orange signs exchanged for clear ones incorporated right into the headlamp real estates. On the Opel design, the signs relocated from the front bumpers, up right into the headlamp real estates, hence looking even more just like the Renault.
